

OUR LOCATIONS

We have routes throughout Oklahoma, Texas, and even a route in New Mexico. Our Head Quarters and processing Plant is located in Wichita Falls and we have an office in Fort Worth. We are consistently growing and adding new location.

Here are a few cities that we currently cover:

- ~ Dallas/Fort Worth
- ~ Austin
- ~ San Antonio
- ~ Amarillo
- ~ Midland
- ~ Odessa
- ~ Abilene
- ~ Lubbock
- ~ Oklahoma City
- ~ Wichita Falls

DID YOU KNOW?

Biodiesel is good for the environment because it reduces soot and smog, reduces carbon monoxide, reduces cancer causing agents, reduces components of acid rain, and reduces air toxins in general by up to 90 percent.

Each gallon of *biodiesel* used saves 4 gallons of fossil fuel and a 2% blend of biodiesel could decrease engine wear by almost 50%.

PROTECTING THE ENVIRONMENT THROUGH WASTE RECYCLING

OUR SERVICES

Double R Grease Service recycles your grease and turns it into by-products used for *Cattle Feed* and *Biodiesel*. We use 55 gallon drum barrels for grease storage because not only are they easy to replace but also leaves your grease storage area clean and odor free.

Prompt, clean, and friendly service is our commitment. We provide top-notch clean containers for your waste grease removal.

We service a wide variety of customers including:

- ~ Food manufactures
- ~ Franchises
- ~ Government and military facilities
- ~ Hospitals and Nursing homes
- ~ Restaurant chains
- ~ Small businesses
- ~ Sporting arenas and complexes
- ~ Theme parks and more.

OUR COMPANY

Double R Grease Service is backed with over 50 years of industrial experience in the waste grease recycling business.

At Double R Grease Service we are committed and hardworking Texan's that take pride in providing the best in customer service and satisfaction.

Double R Grease Service provides top-notch Clean containers for your waste grease removal. Through our commitment, experience, and expertise Double R Grease Service has established a business relationship with our customers that will last a lifetime!

WHY RECYCLE

It is important to dispose of your used cooking grease properly not only because it is required by law but because it is devastating to the environment.

One of the results of improperly disposing of grease, oil and fat is clogged sewer lines. That will lead to sewage spills that can cause public health problems, add unwanted chemicals to our water environment and cause excessive growth of algae that disrupts the ecosystem.
